TROCAL 76.

Outward opening AluClip residential door system.

Outward opening, unique design.

» TROCAL 76 Outward opening AluClip residential door system.

With TROCAL 76 you can have windows and doors that ideally reflect your personal preferences. The doors in the AluClip version unite the advantages of the materials of PVC-U and aluminium in one single product. Elegant aluminium on the exterior offers practically unlimited colour scheme options, while the PVC-U profiles on the inside deliver dimensional stability, excellent functional reliability and they are very easy to clean.

TROCAL 76. Window and door systems with 76 mm construction depth.

■ Safe and space saving.

Outward opening residential doors are used in commercial buildings as emergency exits and in private households to solve problems relating to space constraints in hallways.

■ Excellent heat insulation.

A thermally separated threshold ensures excellent tightness and heat insulation.

■ Barrier-free threshold.

At only 20 mm in height, the threshold satisfies the home accessibility requirements of DIN 18025.

■ Excellent resistance to forced entry.

TROCAL 76 doors can be equipped to satisfy resistance class RC 2.

■ Diversity of design.

The AluClip version provides you with a practically unlimited choice of colour schemes and designs, including elegant eloxal and powder coatings.
